More efficiently manage your entire fleet

# WITH RELIABLE ASSET TRACKING

Verizon Networkfleet Asset Guard

Asset Guard provides precise location information for trailers, generators, heavy-duty equipment, and other fixed or mobile assets.

Easily track assets, view location reports and alerts, identify when an asset has been moved, and access data to optimize how assets are used.

Running a fleet business requires a variety of assets, some at your main office, others in the field. Keeping track of those assets — trailers, sheds, generators, and more — doesn't have to be difficult or time-consuming. With Networkfleet Asset Guard, you can quickly and easily identify the precise location of every fixed or movable asset in your fleet.

### LOCATE AND MANAGE HIGH-VALUE ASSETS

A small piece of hardware mounted to each of the assets you wish to track, Asset Guard combines Networkfleet's patented GPS technology with the Verizon wireless network to provide reliable round-the-clock asset tracking and communications. Within Networkfleet's online application, each of your assets appears on the map for easy visual identification. Managers can track assets alongside fleet vehicles, view reports and alerts to determine exact GPS location, identify when an asset has been moved, and access data to optimize how assets are used.

With Asset Guard, there's no new software to learn. Internal antennas for both cellular and GPS eliminate the need for wired antennas, so the device can be quickly and easily mounted. Long-life lithium batteries provide excellent field reliability.

Rugged and dependable, Asset Guard includes:

- Sealed enclosure (IP67) to withstand harsh weather conditions
- Exceptional cellular and GPS quality
- A large 57-Ahr lithium battery for multi-year deployment
- Highly sensitive GPS (-162 dBm) tracking
- Built-in motion sensor

### CHOOSE YOUR NOTIFICATION FREQUENCY

Asset Guard is preset to automatically send one location notification per asset, per day. If you frequently move fleet assets, flexible configuration options let you receive notifications as often as every 15 minutes.

### LEARN MORE

For more information about Asset Guard, contact your account manager or visit [tracknetonline.com](http://tracknetonline.com).

Configuration Options	Automatic Location Update Frequency	Additional Location Update On Movement	Additional Location Update On Stop	Additional Location Update Frequency While Moving	Assumed Use Case	 Estimated Battery Life*
Default	Once every day	No	No	N/A	N/A	7 years
Update on movement	Once every day	Yes	Yes	No	Moves once a week	6 years
Update on movement with 60 minute frequency	Once every day	Yes	Yes	60 minutes	Moves once a day for 2 hours	3 years
Update on movement with 15 minute frequency	Once every day	Yes	Yes	15 minutes	Moves once a day for 6 hours	1 year
